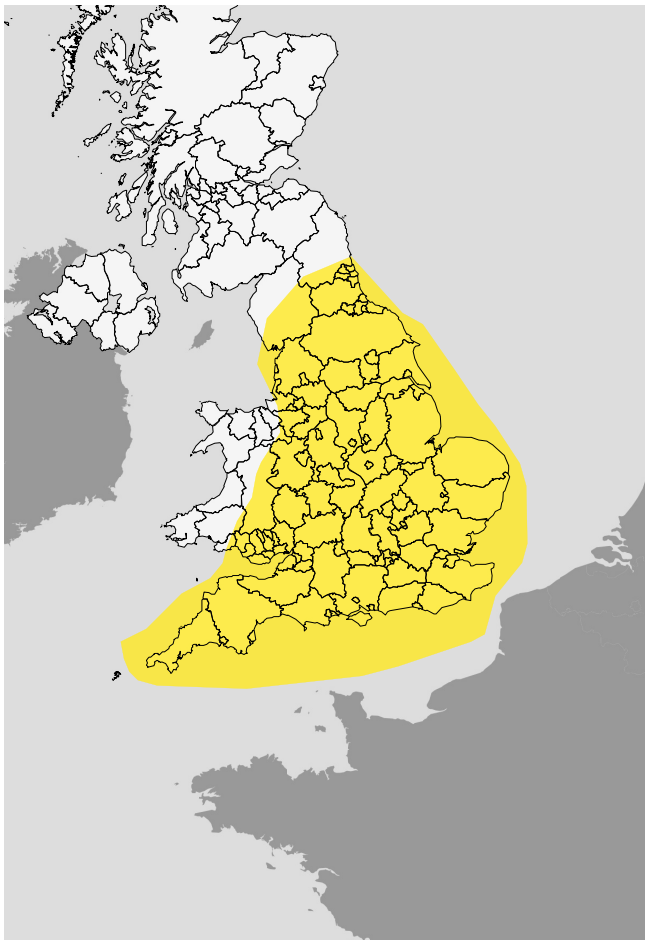
Yellow warning
Wind

Between
18:00 Thu 20 Sep 2018 and
09:00 Fri 21 Sep 2018



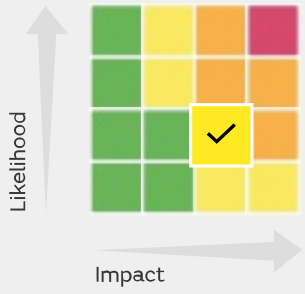
Storm Bronagh brings potential for very strong winds on Thursday evening and overnight into Friday morning.

What to expect

- Some damage to buildings, such as tiles blown from roofs or through falling trees and branches, could happen. Injuries and danger to life from flying debris are possible
- Road, rail, air and ferry services may be affected, with longer journey times and cancellations possible
- Some roads and bridges may close
- Power cuts may occur, with the potential to affect other services, such as mobile phone coverage
- Injuries and danger to life could occur from large waves and beach material being thrown onto sea fronts, coastal roads and properties

Further details

An area of strong winds is likely to develop across parts of Wales and southwest England during Thursday evening before spreading further eastwards across England. The strongest winds are then expected to clear into the North Sea early on Friday. Most likely is that we will see gusts of 45-50 mph in a few spots inland as well as more widely around exposed coasts. However, there is a small chance that stronger winds will develop in some areas with 60-65 mph gusts possible, particularly overnight into Friday across eastern England. The strong winds will accompanied by short-lived outbreaks of very heavy rain in places.



Low likelihood of medium impacts
